## Case 3327

## Amyot, *Méthode mononymique* (1845–1847): proposed correction to Opinion 686

## I.M. Kerzhner

Zoological Institute, Russian Academy of Sciences, Universitetskaya nab. 1, St. Petersburg 199034, Russia

Abstract. The purpose of this application, under Article 80.4 of the Code, is to amend the ruling given in Opinion 686. Confusion has been caused by the omission of part of the work by C.J.B. Amyot, 1845–1847. The work in question is Entomologie Française. Rhynchotes. *Méthode mononymique*, and was published in *Annales de la Société Entomologique de France* and reprinted as a book (Amyot, 1848). It is proposed to amend the entry on the Official Index of Rejected and Invalid Works in Zoology and to correct a pagination error published therein.

**Keywords.** Nomenclature; taxonomy; C.J.B. Amyot, *Méthode Mononymique*; Hemiptera.

- 1. C.J.B. Amyot (1845-1847) published in Annales de la Société entomologique de France a large work in 5 parts; it was repaginated and published subsequently as a book (Amyot, 1848). The non-binominal character of nomenclature used in the whole work was clearly stated by Amyot himself in the Preface (1845, p. 369; 1848, p. 1): 'le mode de nomenclature que nous y avons adopté, sous le titre de Méthode mononymique . . . consiste dans l'application d'un nom unique, donne à chaque espèce, aux lieu de deux, le nom générique et le nom spécifique, comme cela se pratique dans la nomenclature en usage depuis Linné' (translation: the nomenclature which we adopted here under the title 'Uninominal method' consists of the application of a single name to each species, instead of two, the generic name and the specific name, as this is used in nomenclature after Linnaeus). The unavailability of Amyot's work for zoological nomenclature has been stressed in the literature many times. At the time the original application (Z.N.(S.) 1478) was submitted the work was unavailable under Article 25 (b) of the rules then in force: International Rules of Zoological Nomenclature (1905). At the time of publication (1962, BZN 19: 42) Article 10 (c) of the International Code of Zoological Nomenclature reinforced the criteria of availability and all subsequent editions have maintained the Principle of Binominal Nomenclature (see Article 11.4 of the 4th edition of the Code (1999)).
- 2. None of the subsequent parts (of the journal version) of the work contain the subtitle 'Méthode mononymique', but they are clearly marked as continuations ('suite') with a reference to all of the previously published parts and do not differ from the first part in nomenclatural approach.
- 3. Some of Amyot's uninominals were made available as genus- or species-group names by 19th century authors (Lucas, 1849, p. 83; Dallas, 1852, pp. 524, 525; Gorski, 1852, p. 81; Kolenati, 1857, pp. 404, 407, 414, 417, 422, 425, 427; Fieber,

- 1866, p. 505; Mulsant & Rey, 1866, p. 267; 1870, p. 158). Starting with Puton (1899, pp. 13, 17, 18, 89, 99, 100), all these names were credited to these subsequent authors and in concepts used by them, but which do not always coincide with those of Amyot. In most groups this approach was used even earlier (e.g. Stål, 1861, pp. 617, 619 for the names of CICADOIDEA).
- 4. Amyot's work (both journal and book) was rejected for nomenclatural purposes in Opinion 686 (BZN 20: 423) because the author did not apply the principles of binominal nomenclature. Unfortunately the pages of one part of the journal version (vol. 5, pp. 143–238) were not cited in the original proposal (BZN 19: 42) or in Opinion 686 (though figures to this part, t. 2, were cited). This obvious omission and the absence of a subtitle (see above) were used to presume that the part of the work that was not listed in the Opinion was available for nomenclatural purposes and that the uninominal species names of CICADOIDEA contained in this part are available as generic names (see Melville & Sims, 1984; Boulard, 1991; Boulard & Weiner, 2001) with resulting changes in the long established generic nomenclature.
- 5. To eliminate the source of confusion it is proposed under Article 80.4 that the entry on the Official Index of Rejected and Invalid Works in Zoology should be amended to correct the pagination cited for vol. 5 from Amyot, C.J.B. 1847. *Annales de la Société Entomologique de France*, 5: 453–542, t. 2–7 to *ibid*. 5: 143–238, 453–542, t. 2, 7.
  - 6. The International Commission on Zoological Nomenclature is accordingly asked:
  - (1) to amend the ruling given in Opinion 686 to include vol. 5, pp. 143-238;
  - (2) to correct the entry on the Official Index of Rejected and Invalid Works in Zoology for the pagination cited for vol. 5 to pp. 143–238, 453–542, t. 2, 7.
